Education

Northeastern University - Khoury College of Computer Sciences

Master of Science, Computer Science (GPA: 3.92 / 4.0)

Teaching Assistant CS4530 Fundamentals of Software Engineering

San Jose, CA, USA

Aug 2024 - May 2026

Mumbai University - Thadomal Shahani Engineering College

Bachelor of Engineering, Information Technology (GPA: 3.82 / 4.0)

Mumbai, MH, India

Aug 2018 - Aug 2022

Experience

Rhombus Power, Inc

Software Engineer Intern

Palo Alto, CA, USA

Jun 2025 - Aug 2025

- Enabled 95%-accurate real-time fire alerts by architecting a CNN-LSTM Python model with SFIRE-feature fusion.
- Drove \$150K in customer revenue by owning the React and TypeScript web platform for live fire analytics.

McGraw Hill Education

Software Engineer

Mumbai, MH, India

Aug 2023 - Aug 2024

- Cut feature time-to-market 40% by leading 4 engineers to ship 10+ coordinated releases with product teams.
- Improved reliability for 100K+ DAUs by unifying 200K+ disjoint web and mobile resources via TypeScript.
- Reduced user facing data issues 50% by improving Redis-backed API caching and data freshness guarantees.
- Reduced deployment time 20% & regressions 30% by optimizing Lambda deploys and test coverage in Jest.

The Friday Company

Founder

Mumbai, MH, India

Aug 2022 - Aug 2023

- Generated \$30K annual revenue by founding and scaling a B2B SaaS with 6 revenue driving products.
- Boosted booking conversions 35% by delivering sub 200ms reservations via TypeScript microservices and gRPC.
- Protected revenue by eliminating double bookings using PostgreSQL locking and optimistic concurrency control.
- Improved margins 15% by reducing video delivery costs through S3 tiering and CDN optimization.

Projects

Tessa

AI powered web app that generates relevant tweets from code commits

[Live Demo](#)

Mar 2025 - Jun 2025

- Increased user engagement by generating AI tweets with 92% relevance using a Python RAG pipeline.
- Improved content trust by reducing AI hallucinations 75% through structured code search tool integration.
- Scaled automated publishing to 50+ tweets/month via GitHub-to-Twitter API workflows.
- Validated monetization by converting users into 30+ paid customers using Stripe webhook subscriptions.

OnePrediction

iOS app with AI scoring for competing against users on soccer match predictions

[Testflight Link](#)

Aug 2024 - Mar 2025

- Improved system stability 30% by leading code reviews and enforcing consistent architecture.
- Drove engagement for 5K+ users by enabling real-time AI scoring and Redis leaderboards in TypeScript.
- Reduced search time 80% by syncing Postgres to Elasticsearch for fast full-text discovery.
- Shipped features 75% faster by automating AWS deployments with Terraform, Docker and Kubernetes.

Technical Skills

Languages: TypeScript, Python, Java

AI / ML: LangGraph, LangChain, Pinecone, RAG, MCP, Scikit-learn, TensorFlow, PyTorch

Web: React, Express, NextJS, FastAPI, REST, GraphQL, Web Sockets, Webhooks

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch

Cloud & DevOps: AWS (S3, Lambda, EC2, CloudWatch), Docker, Kubernetes, Terraform

Mobile & Tools: iOS(Swift, Objective-C, CoreData, SPM), Git, Postman, JUnit, PyTest, Jest, GitHub Actions
