Experience

Rhombus Power, Inc

Software Engineer Intern

Palo Alto, CA, USA

Jun 2025 - Aug 2025

- Achieved 95% accuracy for real-time fire alerts by architecting a CNN-LSTM **Python** model using **TensorFlow**.
- Drove \$150K in customer revenue by owning the **React/TypeScript** web platform for live fire analytics.
- Reduced incident response time 20% by implementing observability with **CloudWatch** dashboards and alerts.

McGraw Hill Education

Software Engineer

Mumbai, MH, India

Aug 2023 - Aug 2024

- Cut feature time-to-market 40% by leading 4 engineers cross functionally with product to ship 10+ releases.
- Improved reliability at scale for 100K+ DAUs by unifying 200K+ web/mobile resources via TypeScript and **SQL**.
- Reduced user facing data staleness issues 50% by optimizing **Redis** cluster caching with TTL and LRU eviction.
- Reduced deployment time 20% & regressions 30% by optimizing **AWS Lambda** deploys and **Jest** test coverage.

The Friday Company

Founder

Mumbai, MH, India

Aug 2022 - Aug 2023

- Generated \$30K annual revenue by founding and scaling B2B SaaS with 6 revenue driving products.
- Boosted conversions 35% with low-latency sub-200ms reservations via distributed microservices and **gRPC**.
- Protected revenue by eliminating double bookings using **PostgreSQL** locking and optimistic concurrency control.
- Improved margins 15% by reducing video delivery costs through AWS S3 tiering and **CDN** optimization.

Projects

Multimodal Character Generation

Wan diffusion model for video & Dia voice model for speech synthesis

Jan 2026 - Present

- Generated coherent 5-second 720p videos by fine-tuning **Wan 14B** + **LoRA** in **PyTorch** on custom dataset.
- Achieved realistic emotion-controlled speech by conditioning **Dia 1.6B TTS** model from **Hugging Face**.

Tessa

<https://tessa-web-app.vercel.app>

AI powered web app that generates relevant tweets from code commits

Mar 2025 - Jun 2025

- Reduced **LLM** hallucinations 75% and achieved 90% relevant tweets via **RAG** with structured code search tool.
- Deployed **Llama 3.1B** via Dockerized **FastAPI** with optimized prompts using few-shot and CoT reasoning.

OnePrediction

<https://testflight.apple.com/join/f3wk9jpA>

iOS app with scoring for competing against users on soccer match predictions

Aug 2024 - Mar 2025

- Drove engagement for 5K+ users by enabling real-time algorithmic scoring and **Redis** leaderboards in TypeScript.
- Reduced search time 80% by syncing Postgres to **Elasticsearch** for fast full-text discovery.
- Shipped features 75% faster by building **CI/CD** pipelines with **Terraform**, **Docker** and **Kubernetes** on AWS.

Technical Skills

Languages: TypeScript, Python, Java

AI / ML: LangGraph, LangChain, Pinecone, RAG, MCP, Scikit-learn, TensorFlow, PyTorch

Web: React, Express, NextJS, FastAPI, REST, GraphQL, Web Sockets, Webhooks

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch

Cloud & DevOps: AWS (S3, Lambda, EC2, CloudWatch), Docker, Kubernetes, Terraform, CI/CD

Education

Northeastern University - Khoury College of Computer Sciences

Master of Science, Computer Science (GPA: 3.92 / 4.0)

Teaching Assistant CS4530 Fundamentals of Software Engineering

San Jose, CA, USA

Aug 2024 - May 2026

Mumbai University - Thadomal Shahani Engineering College

Bachelor of Engineering, Information Technology (GPA: 3.82 / 4.0)

Mumbai, MH, India

Aug 2018 - Aug 2022
